Figure 2c

The diagram shows a central rectangular block labeled "Filter". On the left side, there are two input ports, each represented by a small shaded rectangle. Two arrows point from the left towards these ports. The top arrow is labeled "City" and the bottom arrow is labeled "Job Title". On the right side of the "Filter" block, there is a single output port, also a small shaded rectangle, with an arrow pointing away from it to the right. This output arrow is labeled with a list of attributes: "State", "City", "Job Title", "Company Name", and "Date Posted".

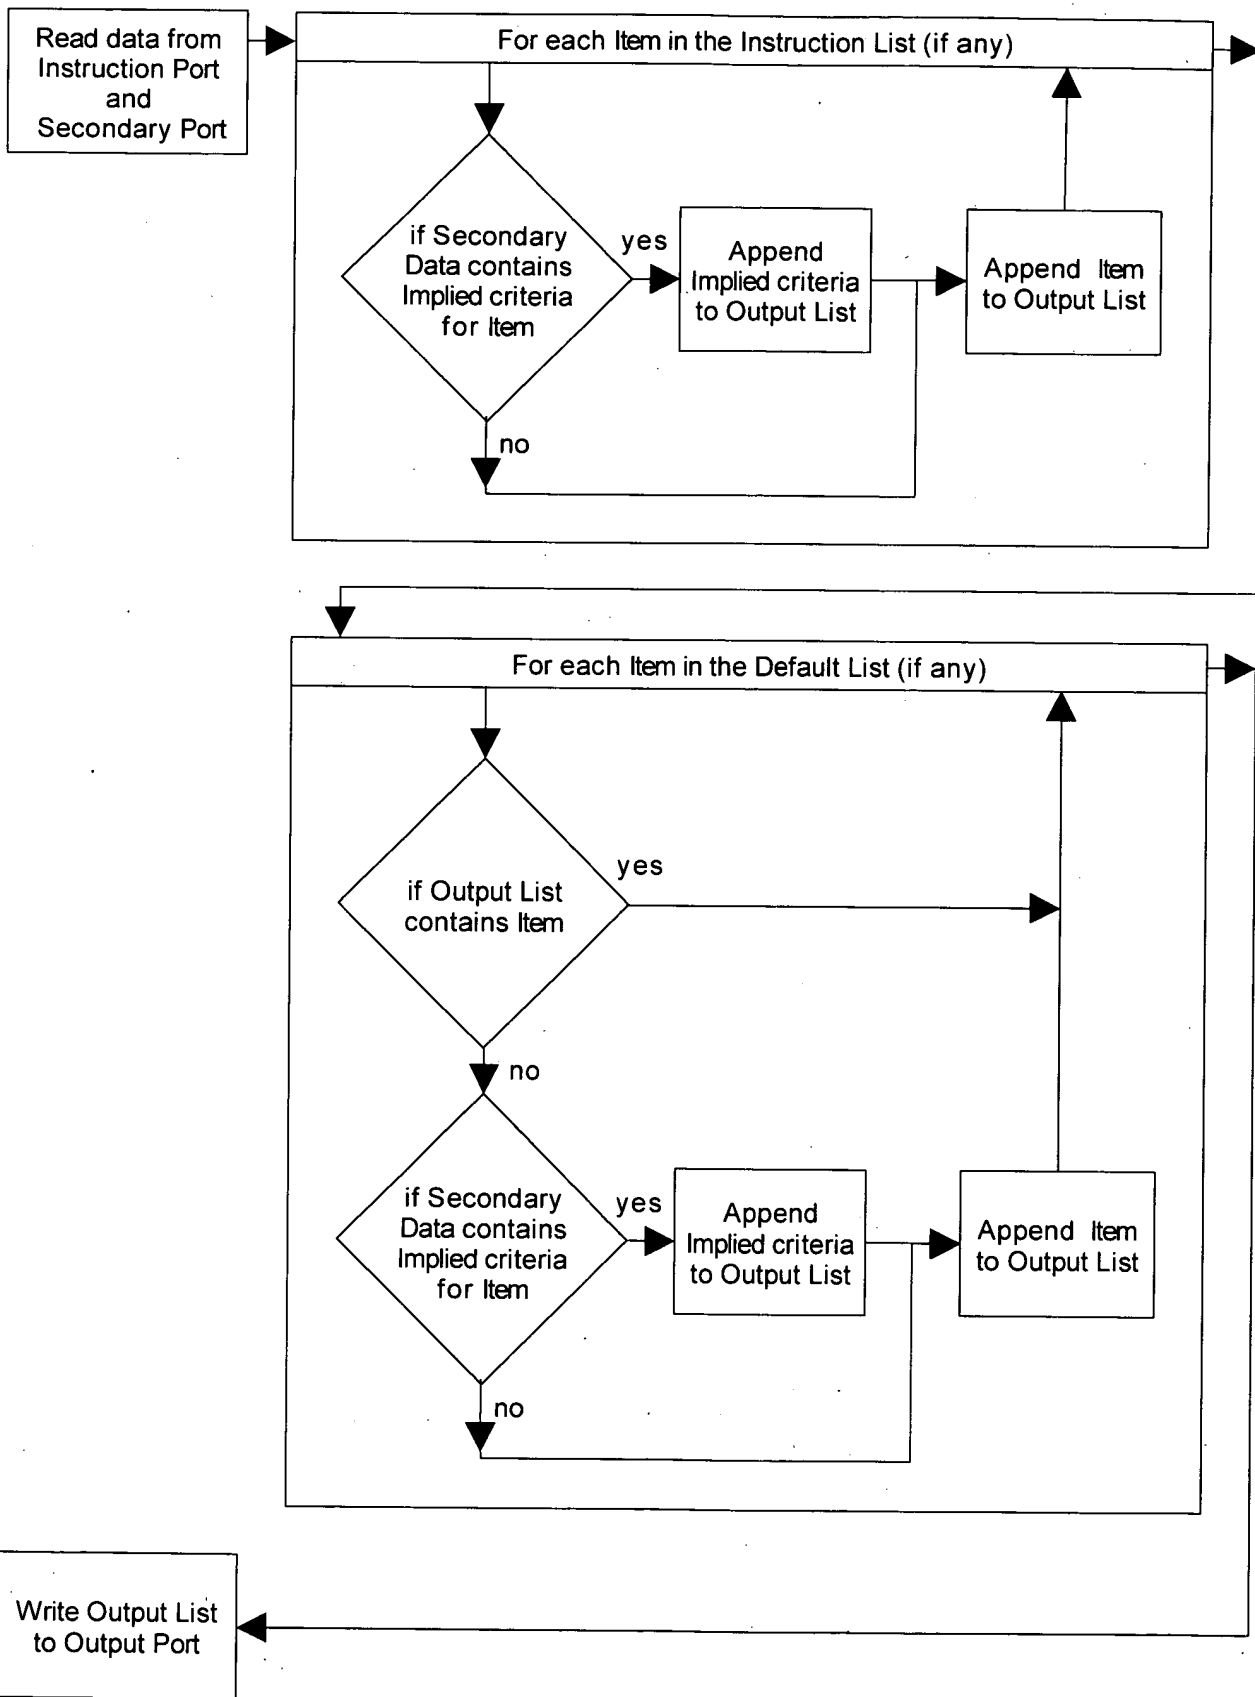

City
Job Title

Filter

State
City
Job Title
Company Name
Date Posted

City IMPLIES State
